"Made with passion"

Our promise

35 YEARS
JAHRE · JAAR
GUARANTEE
GARANTIE · GARANTIE
MADE IN GERMANY

For the entire multi-star® system, multi-star® MINIS, tree care without ladder as well as all mini tools we offer a unique long-term guarantee of 35 years from the 2018 model year onwards. So that the next generation and the one after that will also benefit from the highest quality of the multi-star® system and our mini tools unhindered.

All manual shears are »Made in Germany«. This means we give you a quality promise in terms of high-quality materials, excellent manufacturing, innovative functionality and design combined with the WOLF-Garten quality standard. We not only give you our word on this, but also a 10-year warranty (except for wear parts). The 10-year warranty also applies to multi-star® and mini tools up to model year 2017.

We give you a 3-year warranty on all our motorised gardening tools limited to supplementary performance and according to the guarantee conditions (except for wear parts).

ONE HANDLE, ENDLESS POSSIBILITIES
 Five electric attachments are available in year one of the multi-star® electrification. But we have already lined up many more and you can look forward to many more garden helpers that will make your chores easier and more convenient to master. Practical: The durable and proven click connection between attachment and handle is identical to the legacy multi-star® system, which allows you to conveniently switch back and forth between electric and manual tool heads.

ROBO-SPECIAL LAWN MIX

SPECIAL

ESPECIALLY SUITABLE FOR SOWING AND RE-SEEDING LAWNS CARED FOR BY MOWING ROBOTS

- › Approx. 90.000 shoots/m²
- › Lawn mix geared to the mulching process supports optimal recycling of the clippings of slow-growing grasses
- › With WOLF-Garten GERMINATION GUARANTEE
- › 40 % lower volume of clippings
- › ROBO-Special lawn seeds are suitable both for new lawns as well as for re-seeding existing lawns. They produce very dense growth and suppress weeds, making for easy-care lawns
- › Lawns cared for with mowing robots are cut at very regular, short intervals. ROBO-Special lawn seeds form an extremely dense turf so the lawn provides an ideal surface for mowing robots

BYPASS

The dual-cut or bypass technique is recommended for precise and stump-free cutting of young shoots that promotes wound healing. The slender cutting head means you can cut close to the trunk even in hard-to-reach places.

ANVIL

The single-blade or anvil technology saves up to 20 % effort compared to the two-blade technology. Anvil cutters are ideal for cutting dead or hard wood. Paving the way for easy articulation without cutting impact.

Two cutting options: High-speed (short path for rapidly cutting thin branches) and high-power (double path and therefore double power for cutting thicker branches).

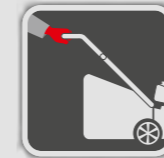

CCM SYSTEM – 3 FUNCTIONS IN A SINGLE MOWER: The CCM system invented by WOLF-Garten and used in many electric and accumulator mowers stands for CUT, COLLECT & MULCH – cutting, collecting and mulching. With the CCM system, a single lawn mower can handle all three tasks. By turning the selector lever you can switch from one mode to the other. In this way, you can mow with or without a grass catcher bag, and in mulching mode, the cuttings can be finely chopped back into the lawn to optimize the nutrient supply.

ACC SYSTEM: The innovative ACC system allows far better cutting and collection results. It prevents the ejection channel from being clogged and facilitates filling of the catching basket. No need to empty the collector bag as frequently as without ACC.

The innovative 3-in-1 function: Moss raking, scarifying, collecting. All A-series scarifiers feature the 3-in-1 system. Combining a moss rake for ventilation plus a scarifying and catching function ensures matchless comfort when gardening.

DRIVE: PUSHED

With these models, you move the lawn mower forward with your own muscle power.

WHEEL DRIVE

Mowers with a simple wheel drive are moved forward at a speed of 3,6 km/h.

The 3 top models are all equipped with the EasySpeed system. This means that these WOLF-Garten lawn mowers automatically adapt to your walking pace up to 3,6 km/h, making mowing much more comfortable.

BIO-ACTIVE's special bioavailability is based on the active ingredient Pseudomonas Paradox, which is also used in other edible plants and forms a natural »shelter« around the root of the plant. At the same time, a natural BIO-ACTIVE germination agent extracted from marine algae accelerates germination by up to 30 %.

START-ACTIVE

Accelerates germination, enables earlier use of the lawn, and thus makes lawn care easier.

IMMUN-ACTIVE

Strengthens resistance to pests and fungal disease.

VITAL-ACTIVE

Improves resistance to stresses such as dryness, heat and cold and optimises nutrient uptake.

GERMINATION GUARANTEE: EXCLUSIVELY FROM WOLF-Garten

Our lawn mixes are so high in quality that we provide a GERMINATION GUARANTEE for correspondingly labelled products exclusively on the German market. We guarantee our seeds will germinate within 6 weeks. Of course, we will replace the seed* if you do not get the germination result you want, despite following the sowing and care instructions.
